USER MANUAL

#project_2 :-

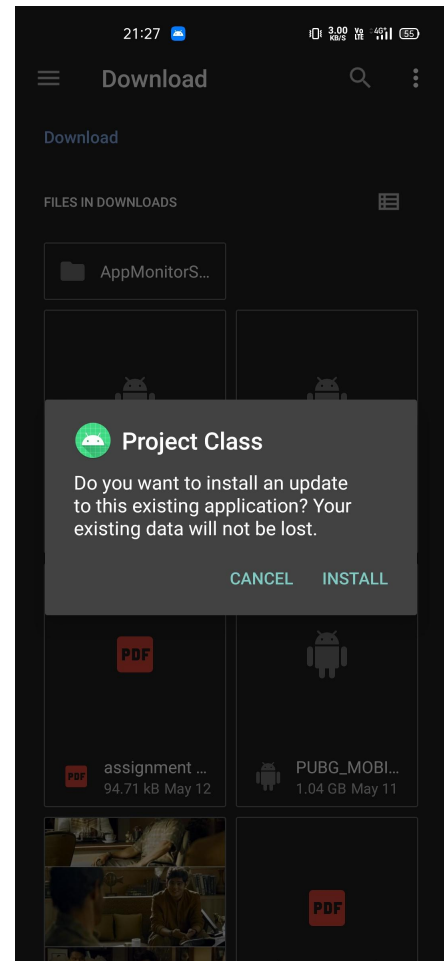

OCCUPANCY MONITORING SYSTEM ANDROID APPLICATION

INSTALLATION MANUAL :-

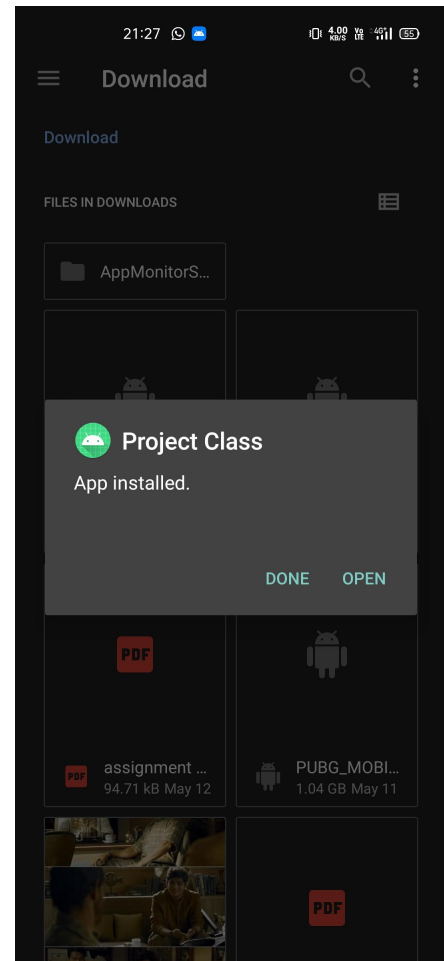

1. Take an android phone
2. In that open the project folder which we submitted
3. Which looks like shown in the above picture.
4. There u can see the project class apk file which we have added extra
5. Download that apk file
6. Which in your system files looks like shown in the below picture

7. Now click on the apk file
8. Then a popup comes out like shown in below image, where you need to press install

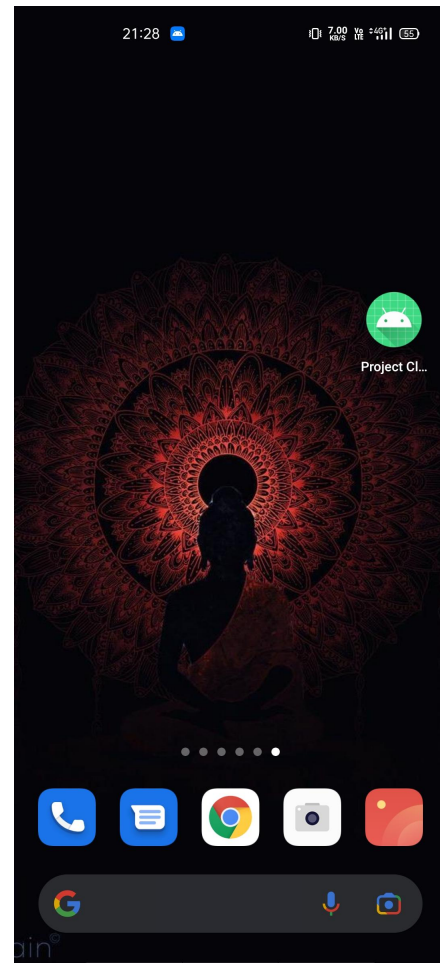

9. And sometimes it may ask you to allow installation from unknown sources
10. You can give permission then, so that installation completes
11. Now after installation completes, the popup comes like shown in the below image

12. Now as installation is over, you can head over to where our app icon is added, in my case it's on the home screen as shown in the image below.

13. Now as we try to open the application, the menu page comes up.

14. Now we can continue with our application.

Now, the Installation is completed on our android device.And for how to proceed the application ,we can check the demo video.
